

Great Apes

Did you know that you are an **ape**? Humans belong to the **ape** family. But, first, what is an **ape** and what makes these mammals so **great**?

Great Apes

Apes are large, intelligent and **playful** animals. The **great apes** live in Africa and Asia. The **ape** family includes orangutans, gibbons, bonobos, gorillas and chimpanzees.

Great Apes

What do **apes** eat? **Apes** are omnivores. They enjoy eating fruits and plants. Sometimes they snack on insects.

Great Apes

Unlike monkeys, **apes** do not have tails. Their arms are longer than their legs. They love to glide and sail through the trees.

Great Apes

Apes can be great parents, both male and female. Their babies **stay** with them for a long time. Baby orangutans will **stay** with their mother until **they** are six or seven years old.

Great Apes

Apes make nests out of leaves to sleep in. **Apes** always like to make their beds each night. **Apes** live a long life. **They** are the longest living mammal. Some can live over fifty years.
