Teachers

These readers have been written to teach a target phoneme. The target phoneme has been highlighted in the text as it can be represented by various different graphemes or spelling patterns, representing a sound family.

Phase 5.5 - Fiction

1. Paint in the Rain
2. Wait for Snail
3. Free the Sheep
4. A Real Seal
5. A Bright Light
6. A Fly in the Pie
7. A Fork in the Road
8. Throw Some Snow
9. Choose a Boot
10. Is It True?
11. Make a Stew
12. The New Unicorn

7. The Volcano Smokes
8. Growing Your Bones
9. Hot Air Balloons
10. Play the Flute
11. The Universe
12. The Future of Music

Word Count: 226

BB146

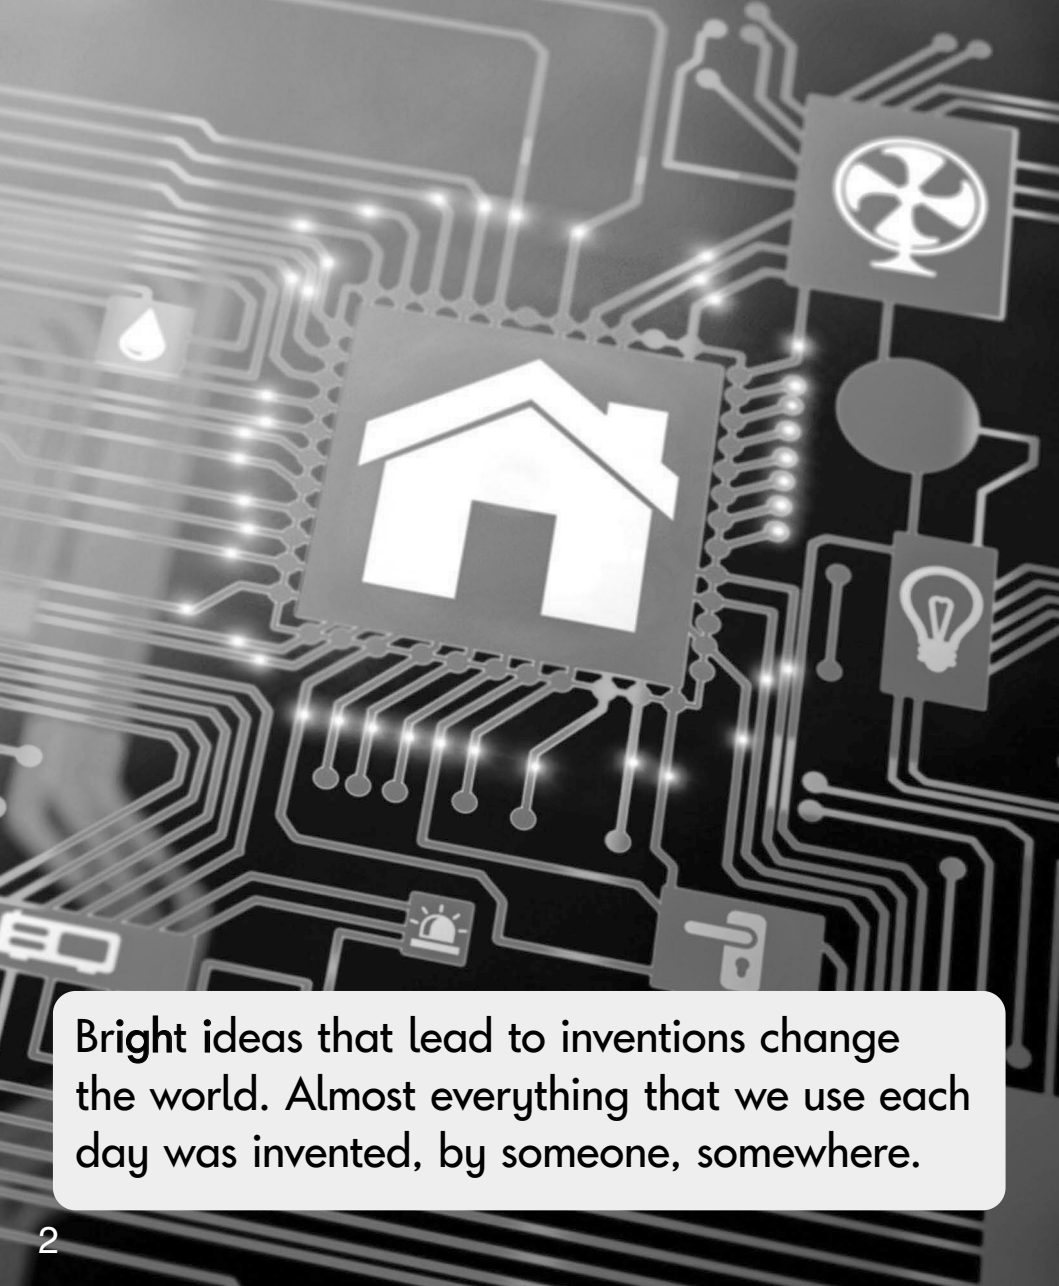

A black and white photograph of a young boy standing with his back to the camera, reaching up towards a wall covered in a dense, chaotic collage of hand-drawn sketches. The sketches include various symbols of technology, science, and nature, such as a rocket ship, a planet, a satellite, a game controller, a clock, a bar chart, a magnifying glass, a dragon, and a person with a lightbulb above their head. The boy is wearing a dark shirt and light-colored pants.

As you can see, there is no end in sight to where we can go with a bright idea. Keep your thinking caps on and you never know which bright idea of your own may change the world.

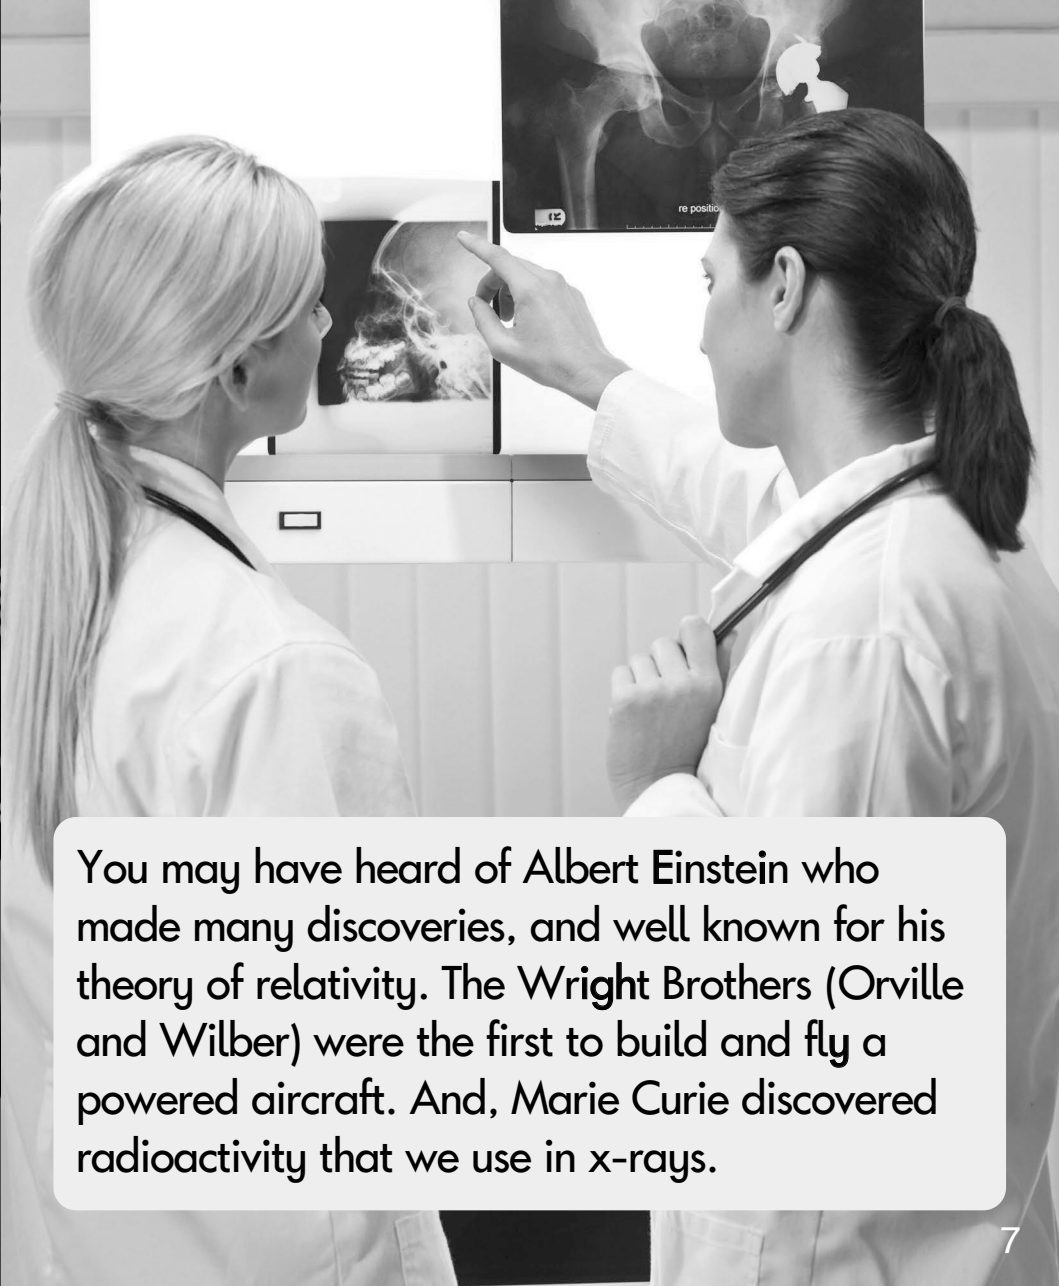

5 igh

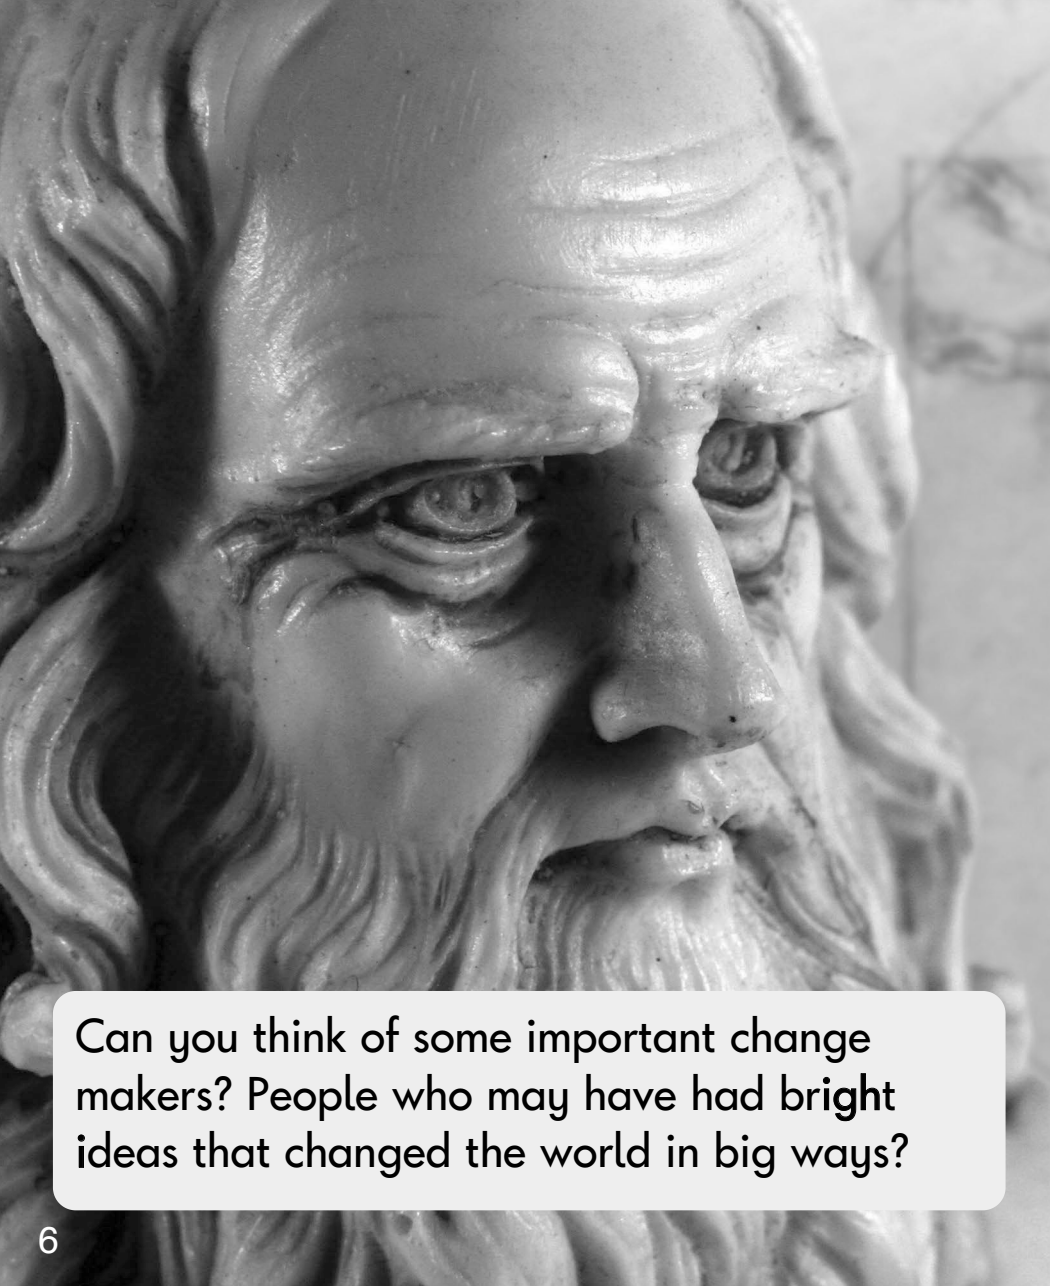

(ie i-e i y)

Bright ideas that lead to inventions change the world. Almost everything that we use each day was invented, by someone, somewhere.

You may have heard of Albert Einstein who made many discoveries, and well known for his theory of relativity. The Wright Brothers (Orville and Wilber) were the first to build and fly a powered aircraft. And, Marie Curie discovered radioactivity that we use in x-rays.

Can you think of some important change makers? People who may have had bright ideas that changed the world in big ways?

Open your eyes and look around your house. Think of the hundreds of inventions that surround you: electricity to heat your home, light bulbs on at night, running water, bikes, key locks and furniture. All made by inventions.

Inventors and scientists are all great problem solvers. They are curious and creative people. They are flexible thinkers. And, they make mistakes and learn from them.

Some inventions are legendary. Some are almost forgotten. Behind almost every great invention there is a person who wanted to solve a problem. But, sometimes an invention is a matter of luck or accidental discovery.
