

Bright Ideas

Bright ideas that lead to inventions change the world. Almost everything that we use each day was invented, by someone, somewhere.

Bright Ideas

Open your **eyes** and look around your house. Think of the hundreds of inventions that surround you: electricity to heat your home, **light** bulbs on at **night**, running water, **bikes**, key locks and furniture. All made by inventions.

Bright Ideas

Inventors and scientists are all great problem solvers. They are curious and creative people. They are flexible thinkers. And, they make mistakes and learn from them.

Bright Ideas

Some inventions are legendary. Some are almost forgotten. Behind almost every great invention there is a person who wanted to solve a problem. But, sometimes an invention is a matter of luck or accidental discovery.

Bright Ideas

Can you think of some important change makers? People who may have had **bright** ideas that changed the world in big ways?

Bright Ideas

Bright Ideas

You may have heard of Albert Einstein who made many discoveries, and well known for his theory of relativity. The Wright Brothers (Orville and Wilber) were the first to build and fly a powered aircraft. And, Marie Curie discovered radioactivity that we use in x-rays.

Bright Ideas

As you can see, there is no end in sight to where we can go with a bright idea. Keep your thinking caps on and you never know which bright idea of your own may change the world.
