Play the Flute

The sound of a **flute** is high, like a bird. It matches well with other instruments like violins and pianos. Now, will you choose to play the flute?

(ue ew u-e ou)

Have you ever played the flute? The flute is a member of the woodwind section of an orchestra. It is true that a person who plays the flute is called a flautist or a flutist.

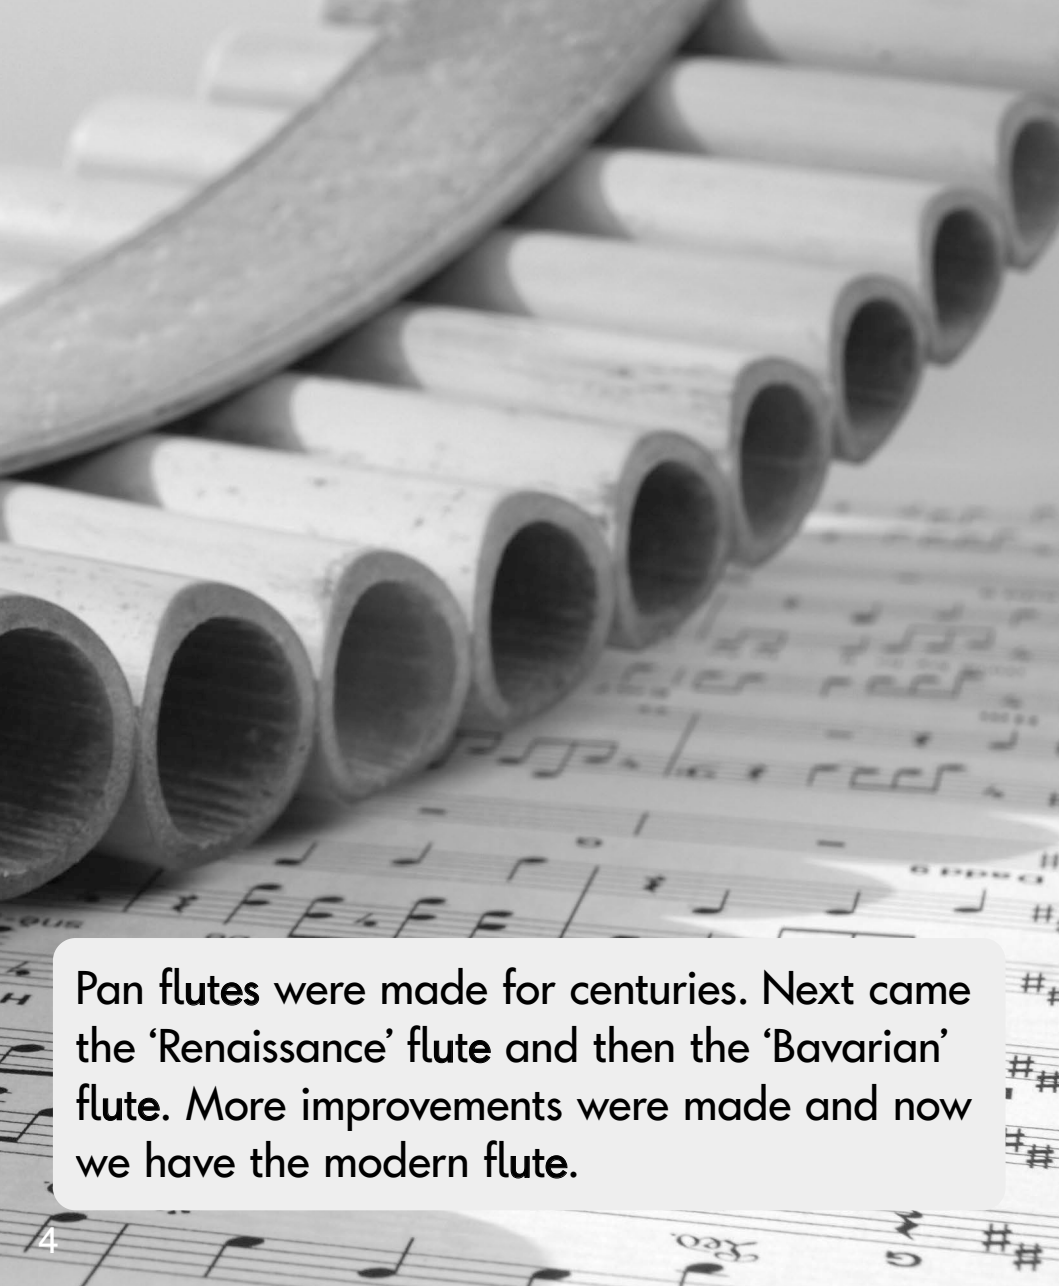

Flautists can change pitch by pushing buttons or through changing the direction of their breath. The buttons are called keys. Breath can move or change the tone or volume.

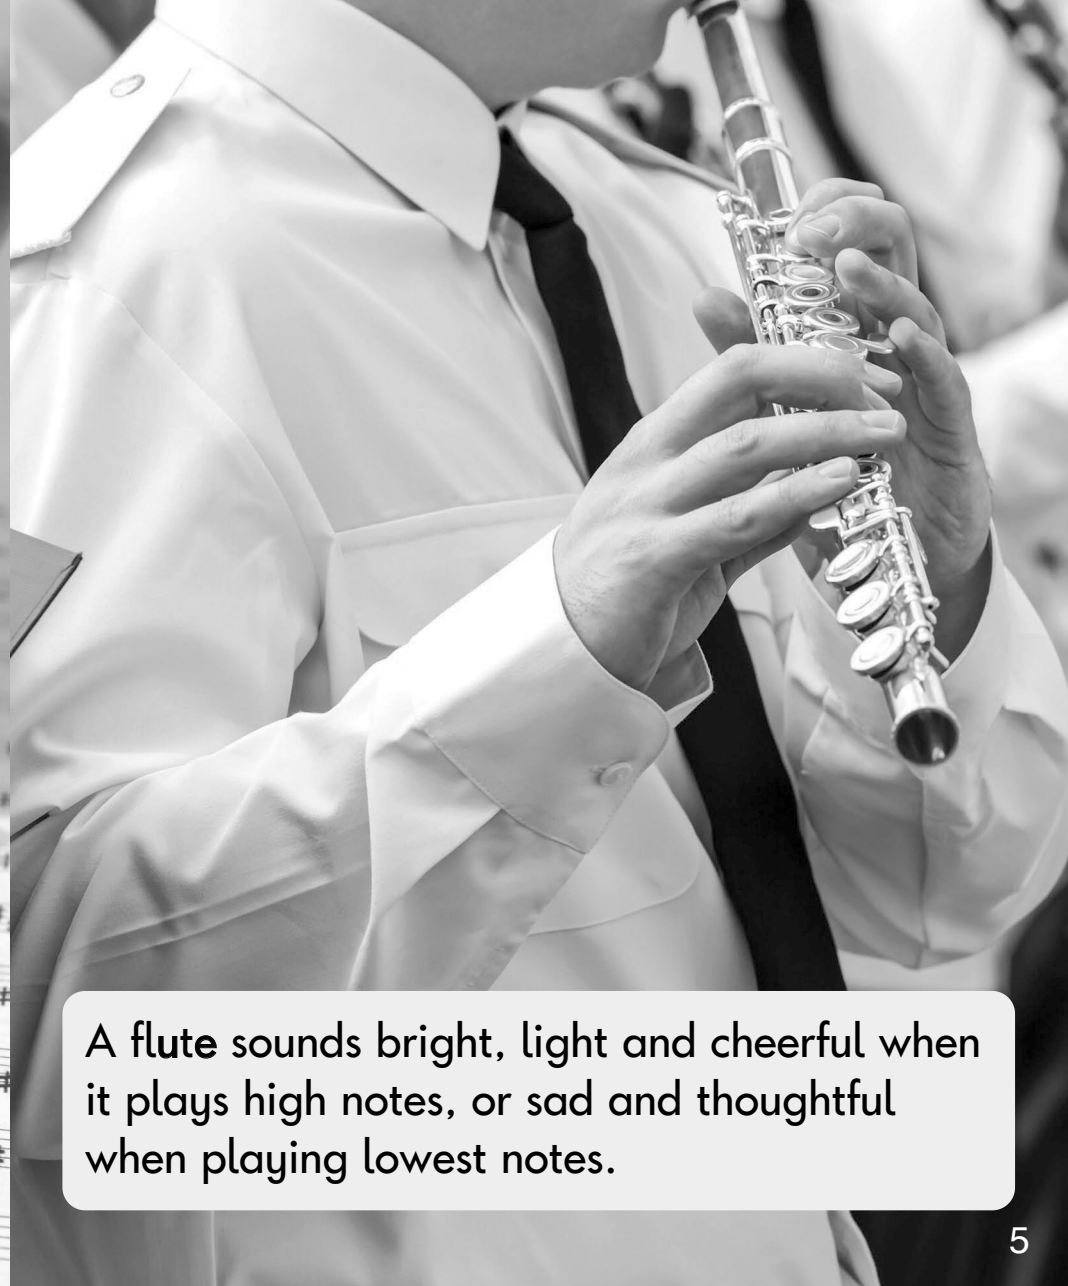

A flute is held flat, and a sound is made by blowing breath over the edges of the hole of the flute's head. The vibration of air makes its sound.

The flute is a musical instrument that has an interesting history. Flutes have been around for centuries. Flutes can be seen in paintings as far back as the 14th century.

Pan flutes were made for centuries. Next came the 'Renaissance' flute and then the 'Bavarian' flute. More improvements were made and now we have the modern flute.

A flute sounds bright, light and cheerful when it plays high notes, or sad and thoughtful when playing lowest notes.
