

Soft Metals

We can get metals from rocks and minerals. Metals are a solid. You might think that all metals are hard. But, there are metals that are soft. Zinc is a soft metal. Here is a zinc bucket.

Soft Metals

A soft metal can be cut. A soft metal can dent. A soft metal can bend. Soft metals can be hammered into sheets.

Soft Metals

Copper is a soft metal. We can put copper sheets into roofs.

Soft Metals

Tin is a soft metal. We can bend tin into tin cans. We can put tin into tin foil.

Soft Metals

Gold is a soft metal. We get gold from a gold nugget.

Soft Metals

Soft Metals

Here is a wooden chest of silver and gold coins.

Soft Metals

Gold costs a lot. Gold can be a gift in a ring or a chain and we can keep gold bars in the bank.
