

Crab with a Shell

Crabs are odd bods. A crab is a decapod. A decapod has ten legs.

Crab with a Shell

Crabs have a thick shell. Crabs are not like fish.

Crab with a Shell

Crabs get into rocks. Can you see the crab in the crack in this rock?

Crab with a Shell

Some crabs shelter on land. Some crabs dig a deep tunnel into the sand. Some crabs like trees!

Crab with a Shell

Have you seen a hermit crab? This is a hermit crab. A hermit crab likes to have a shell on its back.

Crab with a Shell

The hermit creeps into the shell. The hermit crab checks to see that the shell fits.

Crab with a Shell

If it gets cramped in the shell, the hermit crab will look for a bigger shell. Crabs are odd bods!
