Blast Off to the Moon

We can land on the Moon. I am glad that we can blast off to the Moon!

7 pl bl gl

Hop on a rocket ship and blast off to the Moon.

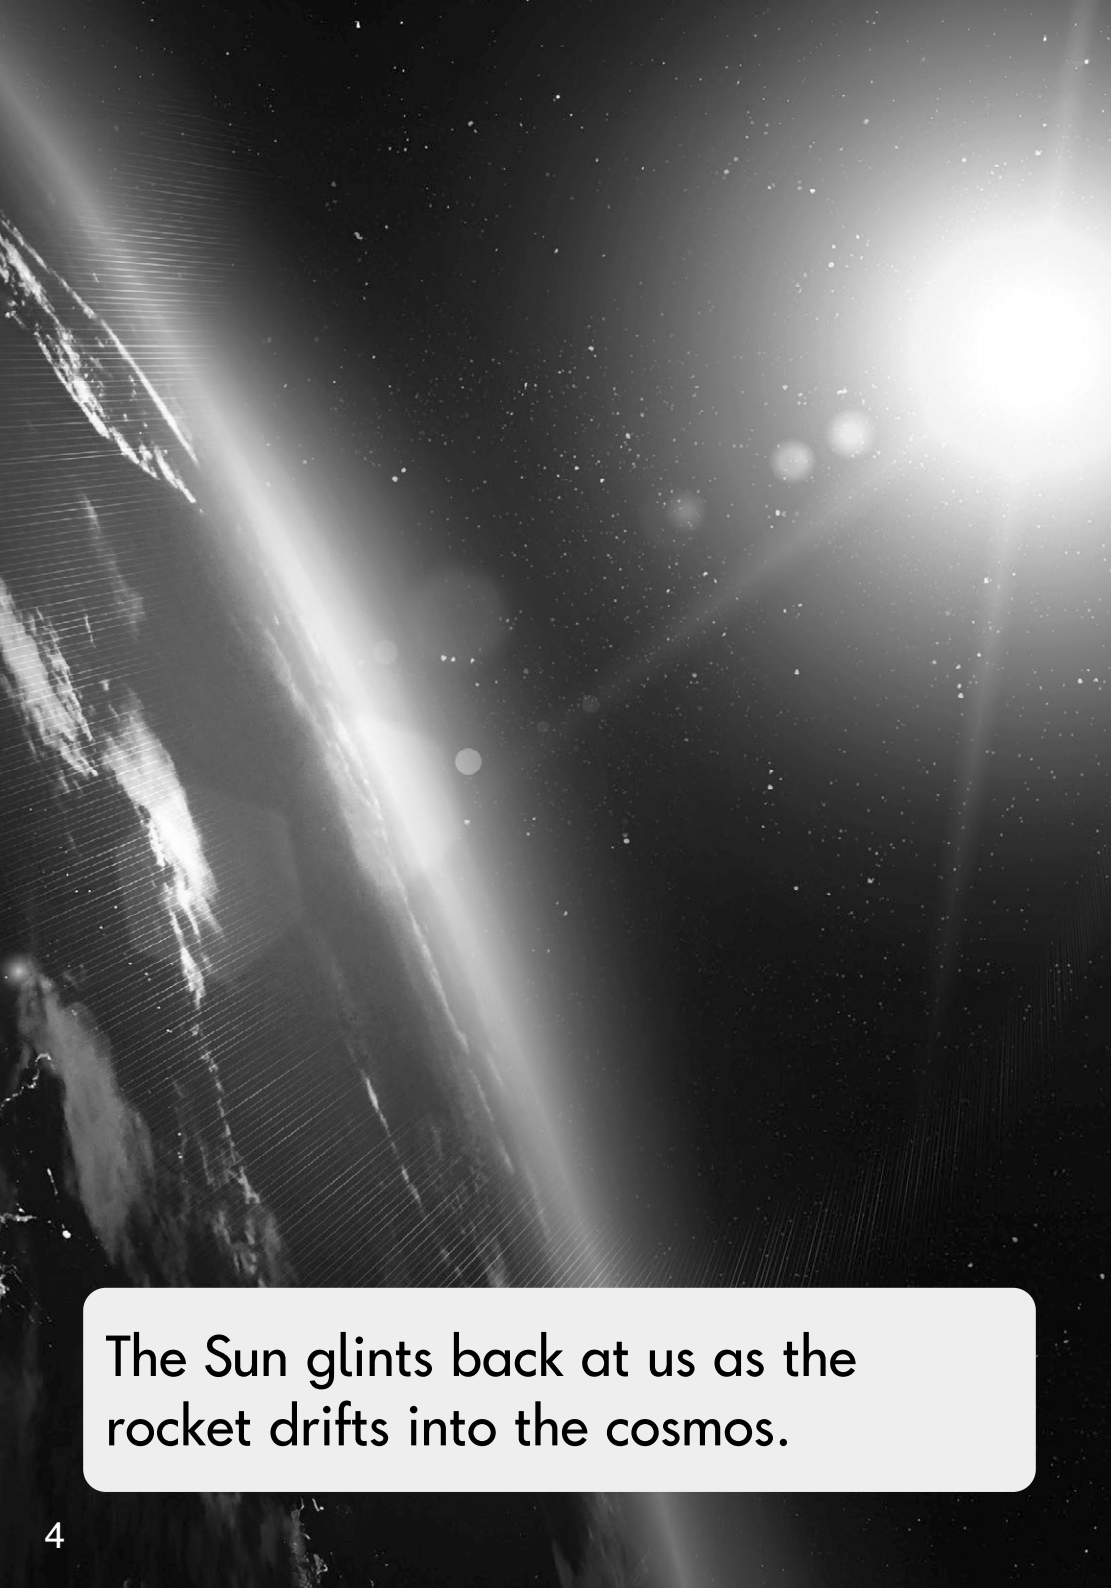

Can we get to Saturn? No. Saturn is big and full of gas. Look at the rings. Saturn is too far for us to land on it.

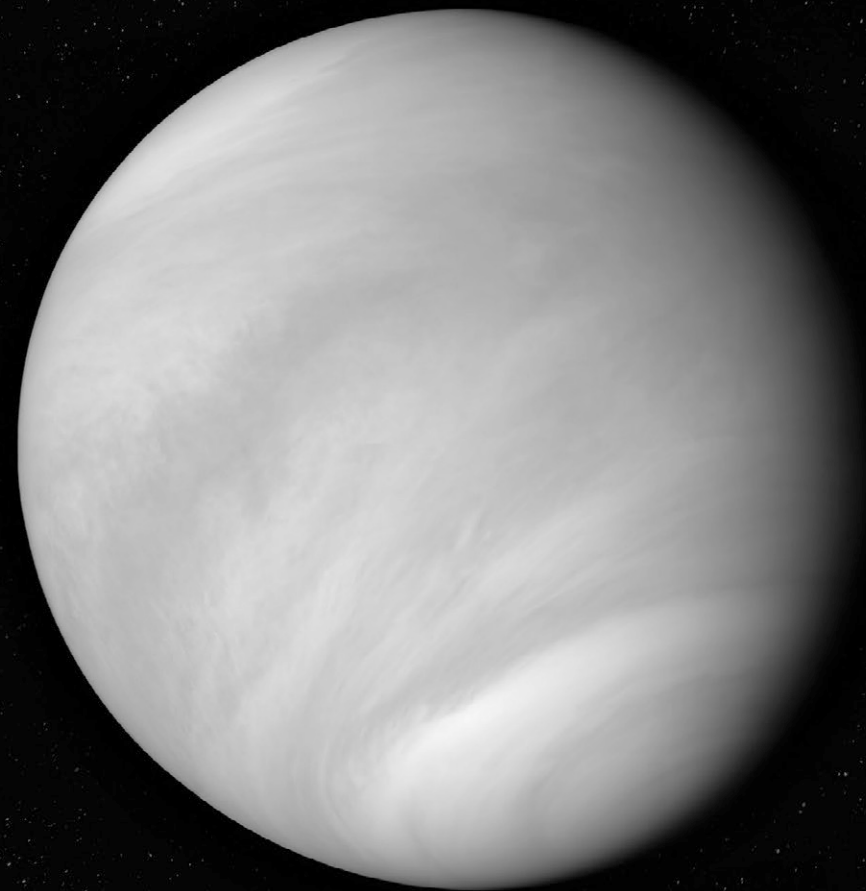

Can we get to Mars? No. Mars is the red planet. It is too cold for us. We can send a robot to land there.

Lift off! Blast off! Blink and you will miss it. Higher and higher we go.

The Sun glints back at us as the rocket drifts into the cosmos.

Look out the window. Venus is the brightest planet. We can see it at night.
