

Blast Off to the Moon

Hop on a rocket ship and blast off to the Moon.

Blast Off to the Moon

Lift off! Blast off! Blink and you will miss it. Higher and higher we go.

Blast Off to the Moon

The Sun glints back at us as the rocket drifts into the cosmos.

Blast Off to the Moon

Look out the window. Venus is the brightest planet. We can see it at night.

Blast Off to the Moon

Can we get to Mars? No. Mars is the red planet. It is too cold for us. We can send a robot to land there.

Blast Off to the Moon

Can we get to Saturn? No. Saturn is big and full of gas. Look at the rings. Saturn is too far for us to land on it.

Blast Off to the Moon

We can land on the Moon. I am glad that we can blast off to the Moon!

Blast Off to the Moon
