Snail Trails

Can you spot a snail trail in the garden? Check that you do not step on a snail. Look under a rock or a log and you might just see a snail!

9 st sp sn

Have you seen a snail in a garden? Snails look a bit like a slug with a shell. Snails are soft with a hard shell on their back.

Snails are nocturnal. They like to come out at night.

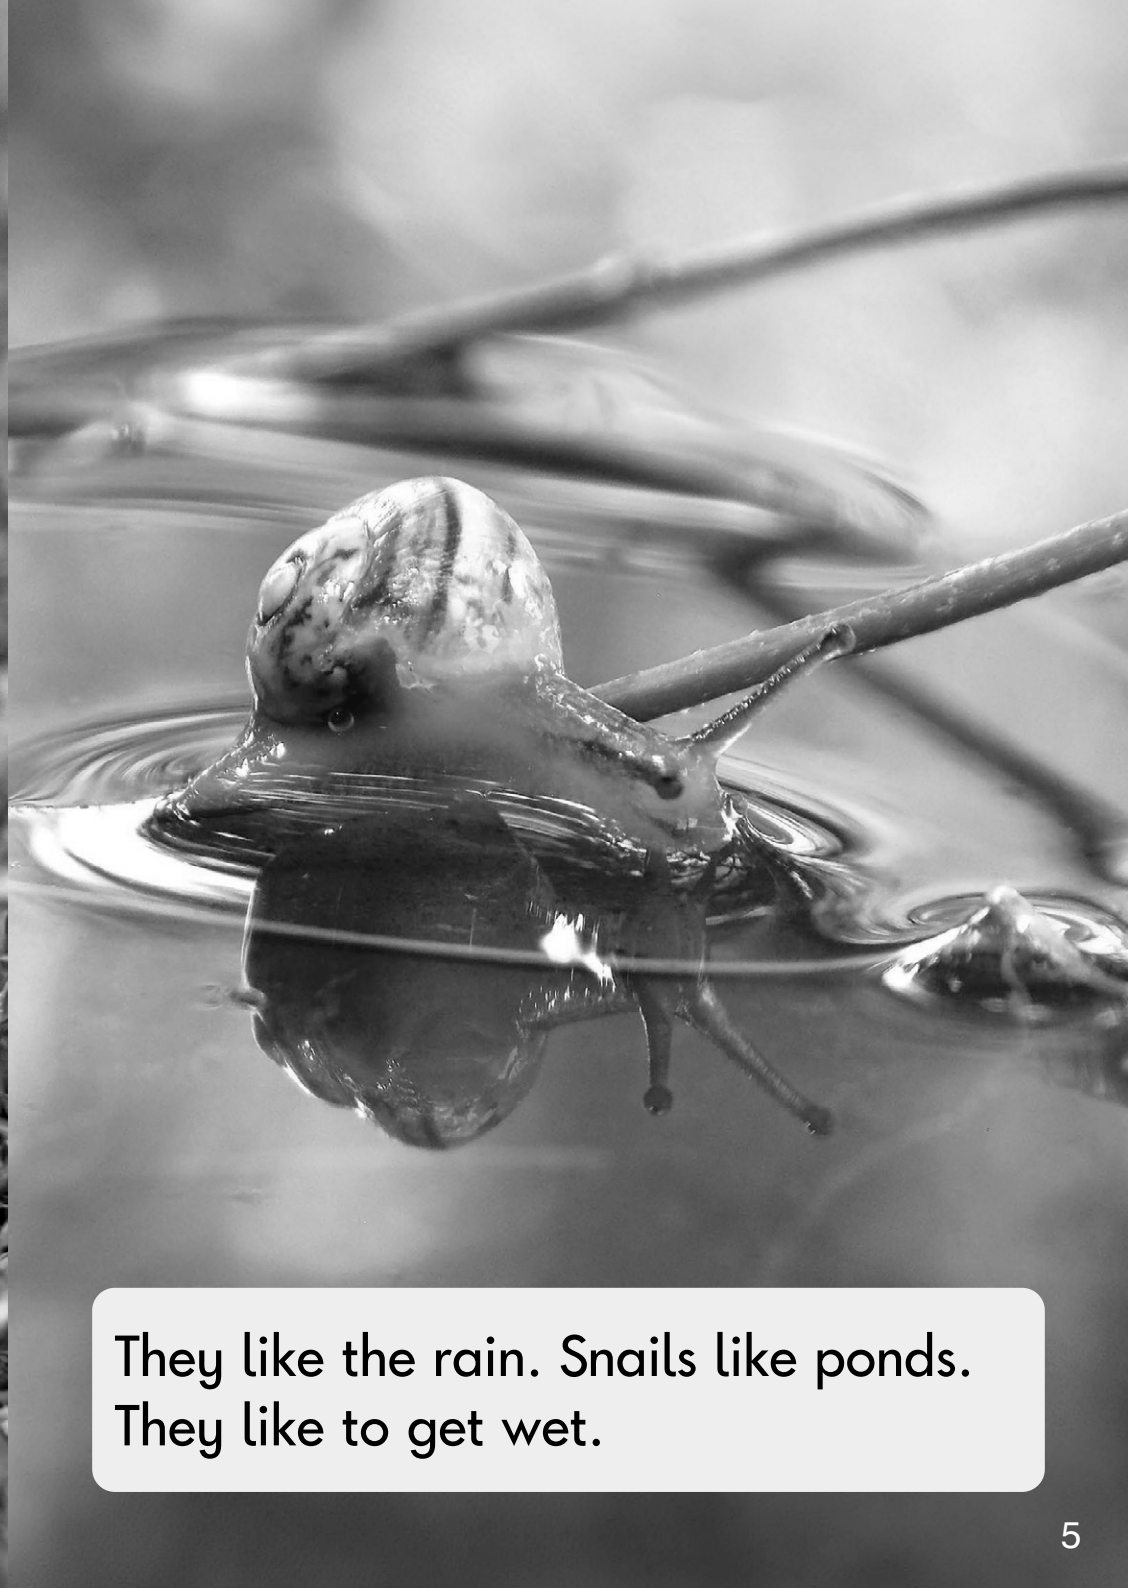

Snails like to snack on green plants in the garden.

A snail's shell protects them. They can pull into their shell as they need to.

Snails like to go to the dark and damp spots in the garden.

They like the rain. Snails like ponds. They like to get wet.
