The Coral Reef

Coral reefs are so important to all of us. We need to protect the coral reefs.

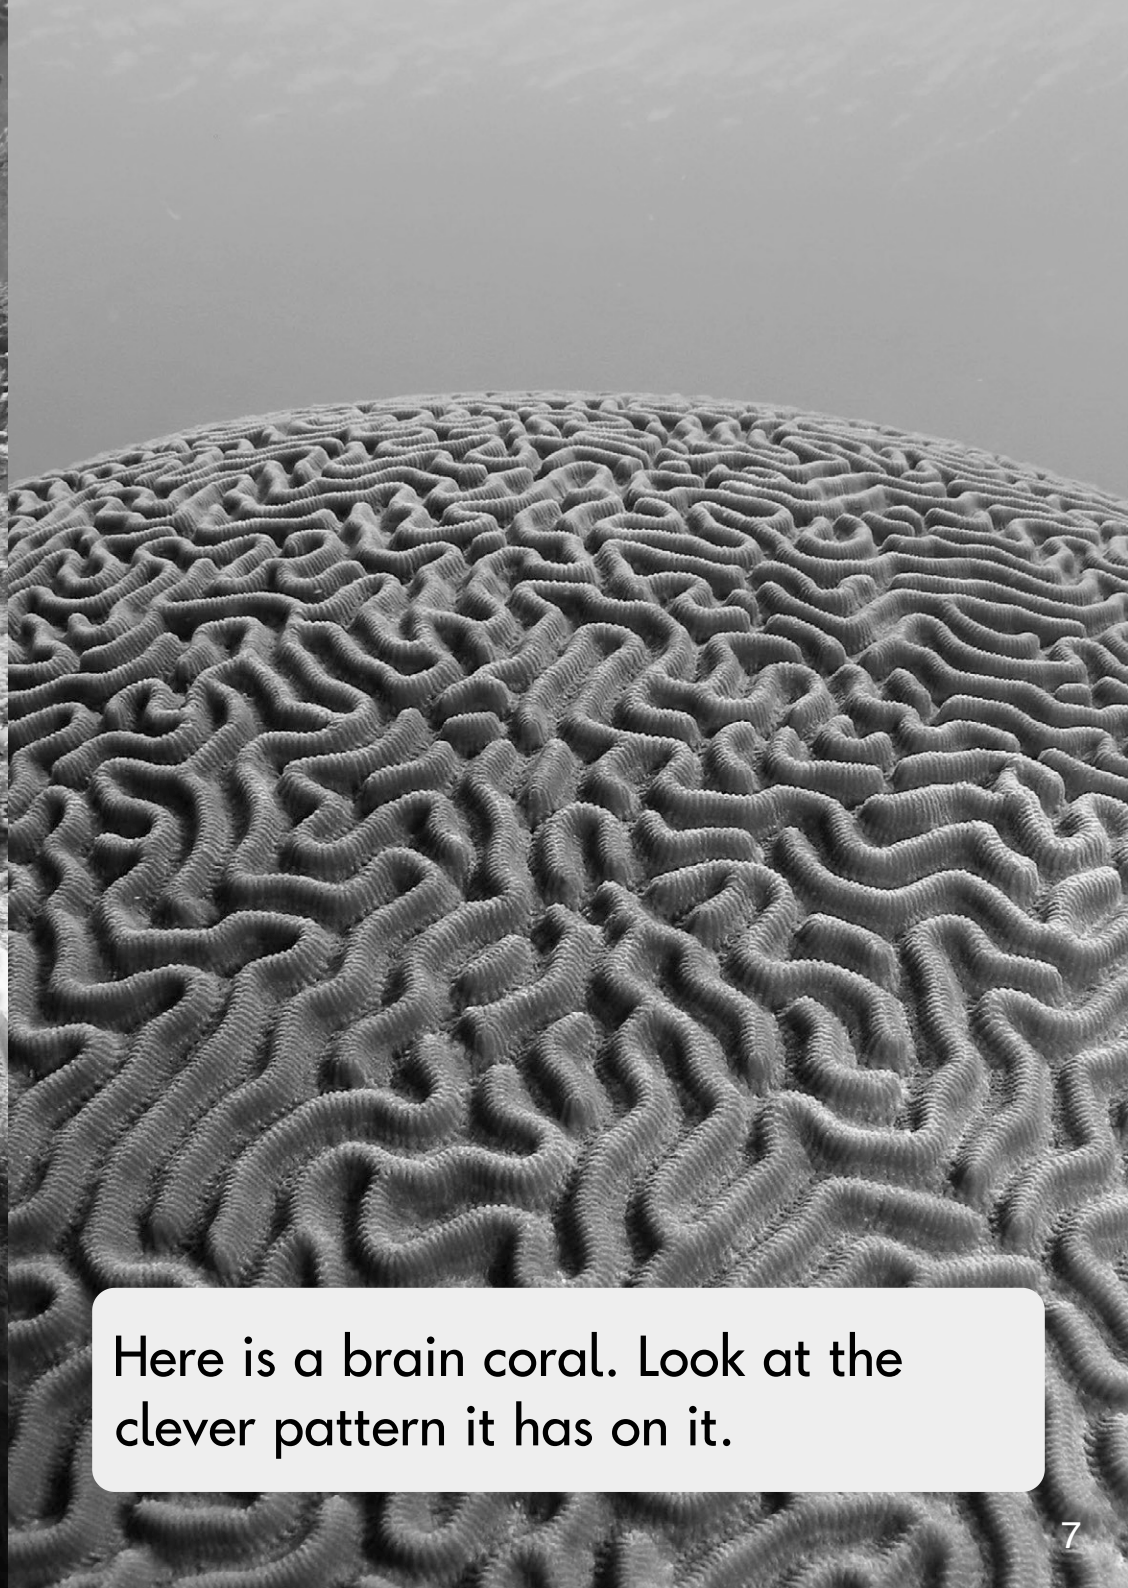

12

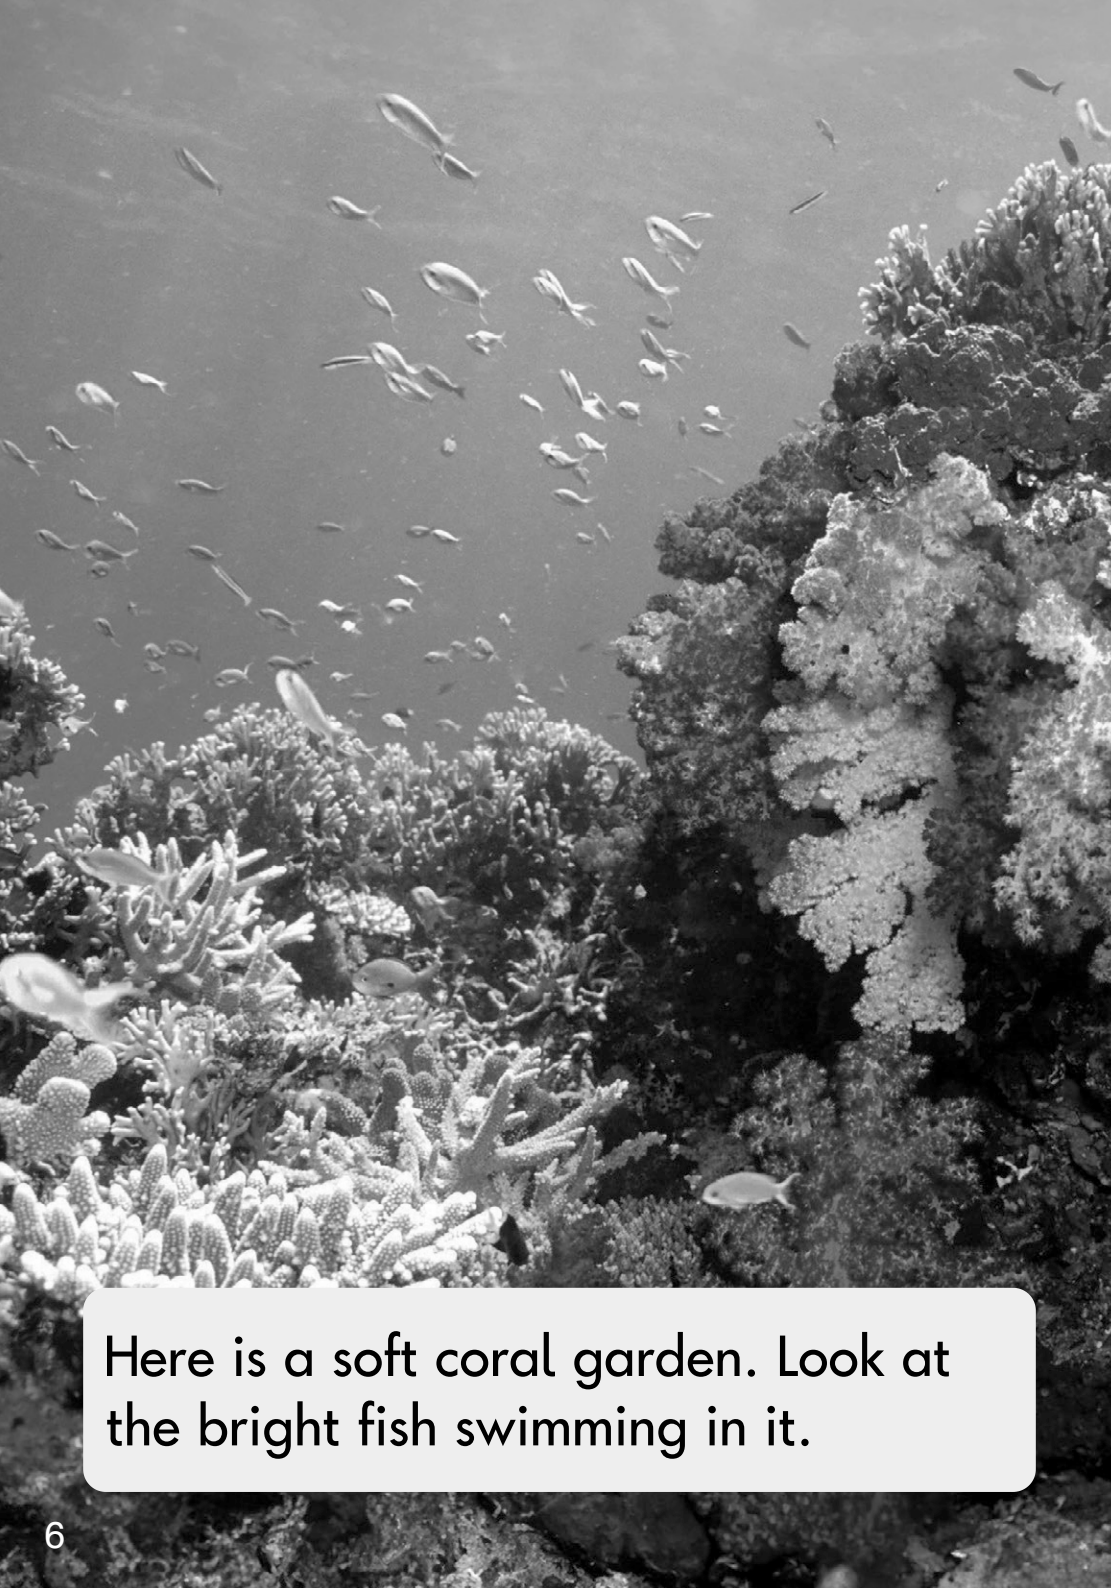

Blends - long vowel

What is a coral reef? A coral reef is not just some bits of odd rock.

Here is a brain coral. Look at the clever pattern it has on it.

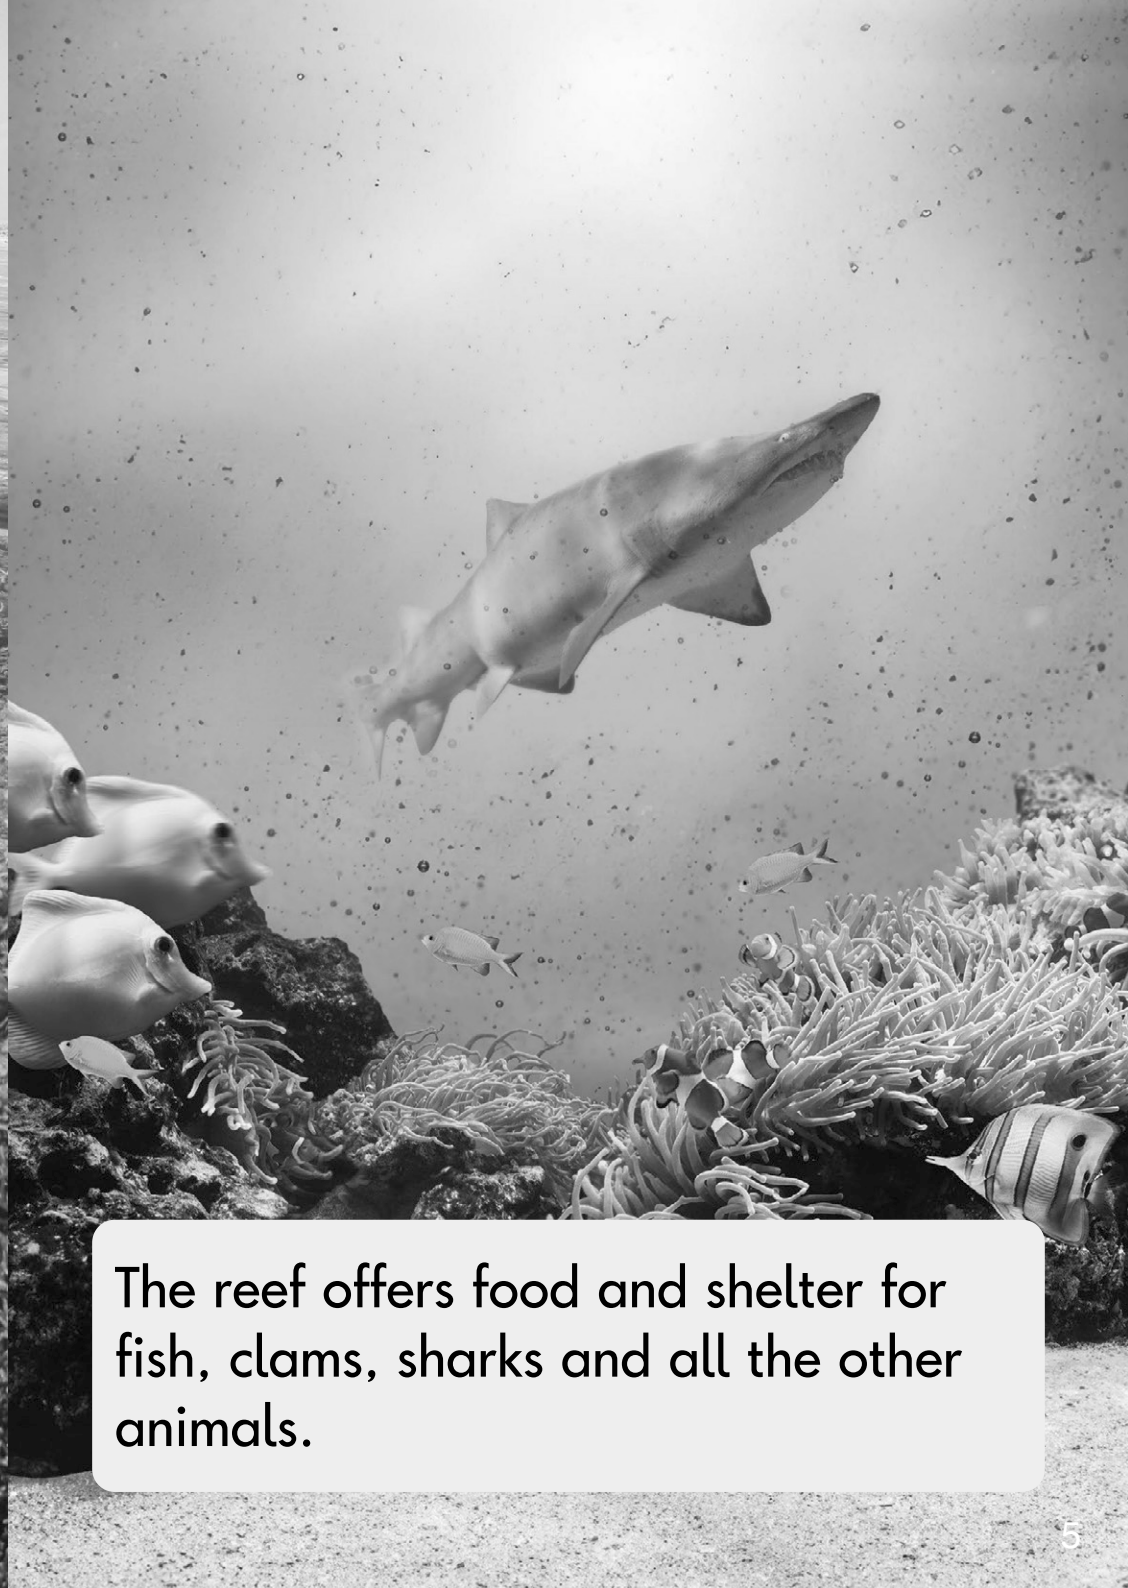

Here is a soft coral garden. Look at the bright fish swimming in it.

A coral reef is made up of little animals called coral polyps. Polyps stick together and grow the reef.

Coral reefs like sunlight and shallow seas to grow best.

The reef offers food and shelter for fish, clams, sharks and all the other animals.
