

The Coral Reef

What is a coral reef? A coral reef is not just some bits of odd rock.

The Coral Reef

A coral reef is made up of little animals called coral polyps. Polyps stick together and grow the reef.

The Coral Reef

Coral reefs like sunlight and shallow seas to grow best.

The Coral Reef

The reef offers food and shelter for fish, clams, sharks and all the other animals.

The Coral Reef

Here is a soft coral garden. Look at the bright fish swimming in it.

The Coral Reef

Here is a brain coral. Look at the clever pattern it has on it.

The Coral Reef

Coral reefs are so important to all of us. We need to protect the coral reefs.
