Teachers / Parents

These decodable readers have been written using a strictly controlled vocabulary. Text uses only **decodable regular words** (according to the week by week progression of Rainbow Phonics) along with '**Heart Words**'. Heart Words (common exception words) are frequently used words that are not decodable at this phase.

Phase Five - Non-Fiction (Life Science)

1. The Deep Sea
2. Birds and Beaks
3. Paws and Claws
4. What is an Elephant?
5. A Haul of Honey
6. Soil is Alive!
7. Name the Bone
8. Your Brain, Your Supercomputer
9. Apex Predators
10. Extreme Environments
11. Reptiles, Hot or Cold?
12. Seeds on the Move

The Deep Sea

Pilots on the ship control the robot and can see with a camera. The camera zooms in on the sea floor and the robot arms can pick up objects. Yet, there is still so much to learn about the deep sea.

The bottom of the deep sea. What have you heard or read about the deep sea? Is it dark down there? Can we get down to the bottom of the ocean?

Scientists use robots to discover and understand what lies at the bottom of the ocean. Underwater robots are connected to a ship by a long power cable.

Today, we have found out a lot about the deep sea and the animals within it, because of scientists and their use of underwater robots.

The ocean is made up of three zones. The **sunlight zone** gets heat from the sun. The **twilight zone** is cold and dark. The **midnight zone** gets no sunlight at all.

In the bottom layers of the sea, there is total darkness. In this dark twilight, animals can exist. The animals down here have adapted to the harsh environment. The fish are soft. Some of the deep-sea animals can make their own light.

Deep-sea angler fish have a long, thin rod on their head with a light on the end of it. This is a fin ray. Other fish see the light and swim to it. The angler fish catches them to eat. It acts like a fishing rod.
