## Teachers / Parents

These decodable readers have been written using a strictly controlled vocabulary. Text uses only **decodable regular words** (according to the week by week progression of Rainbow Phonics) along with '**Heart Words**'. Heart Words (common exception words) are frequently used words that are not decodable at this phase.

## Phase Five - Non-Fiction (Life Science)

1. The Deep Sea
2. Birds and Beaks
3. Paws and Claws
4. What is an Elephant?
5. A Haul of Honey
6. Soil is Alive!
7. Name the Bone
8. Your Brain, Your Supercomputer
9. Apex Predators
10. Extreme Environments
11. Reptiles, Hot or Cold?
12. Seeds on the Move

Word Count: 206

# A Haul of Honey

Look at this. It looks like a good haul of honey. The beekeeper has collected a lot of honey and some beeswax too.

Do you like honey? Where do we get honey from? Who collects the honey that we like to eat so much? Bees make the honey. Beekeepers collect the honey.

Next, it is the beekeeper's job to collect the honey from the honey boxes (or hives). Here, the beekeepers are checking and collecting the honey from the boxes and trays.

In the hive, the bees fan their honey mix with their wings. The honey mix gets thicker and turns into honey.

Bees like to flap their wings on a sunny day! But, bees are important little insects. Here are a few facts about bees and honey.

Bees make the honey. They pollinate flowers and gather nectar. When a bee lands on a flower, some of this pollen sticks to the bee. Next, the bee flies to another flower. It brings the pollen with it. Some of this pollen drops onto the next flower. This pollinates the flower, and so on.

The nectar that the bee sucks up turns into a sugar mix. The bee flies back to the beehive and delivers the honey mix.
