

Inventing the Telephone

In the modern world, we all use telephones in some form to communicate. But, have you ever wondered who invented the telephone?

Inventing the Telephone

Alexander Graham Bell came up with the telephone. Bell's invention is one that certainly changed the world. Today, the telephone is still one of the world's most important communication devices.

Inventing the Telephone

Alexander Graham Bell was born in Scotland in 1847. He was an inventor, a scientist and he also worked as a teacher to deaf students.

Inventing the Telephone

Alexander's mother was almost completely deaf. His brother and father worked in teaching deaf people to speak. Alexander worked with them, and this is where he grew his interest in speech and sound.

Inventing the Telephone

In the mid-1870s, Alexander worked with Thomas Watson on inventing a machine that used electricity to send sound. Bell wondered if it might be possible to transmit the sound of the human voice along a wire.

Inventing the Telephone

In 1876, Bell and Watson made the first successful test of the telephone. Human words were spoken through this machine. When Bell and Watson demonstrated their telephone to the public, people thought it was amazing.

Inventing the
Telephone

After the invention of this telephone device, Alexander continued with other inventions and scientific interests. He also set up an organization to teach speech to the hearing-impaired.
