

Welcome to rollover for Wushka!

Rollover is simply the process of rolling over your data and setting up classes for a new academic year. All Wushka schools will need to perform a rollover to ensure students and teachers are assigned to their correct 2023 classes.

Don't worry, it's easy! Before you get started, there are a few things you'll need:

Access to a Program Coordinator Account: You must be the Program Coordinator to perform a rollover

1

2023 Class Lists: Have your 2023 Class Lists handy (including new kindys!)

2

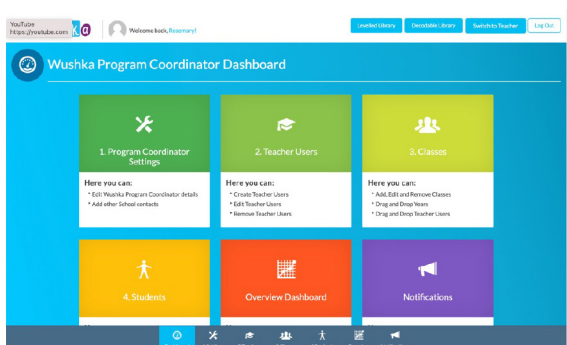

Focus time: About 15-60 minutes focus time (depending on your school size)

3

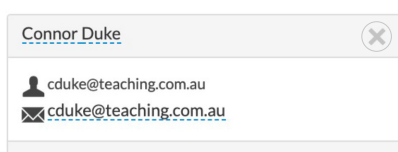

Step 1 - Organise Teachers

Here's where we update teachers for 2023.

1 Click **2. TEACHER USERS**.

2 **DELETE** any teachers who won't need access to Wushka in 2023 by clicking the x in the top right.

3 **ADD** any new teachers who will need access to Wushka in 2023 in the **a. ADD NEW TEACHER USER** area.

a. Add New Teacher User

First Name

Surname

Email / Username

Once a username is set it cannot be changed.
A username must be a valid email address.

Add New Teacher

HINT: You can send new activation emails by clicking the envelope icon on the teacher tile.

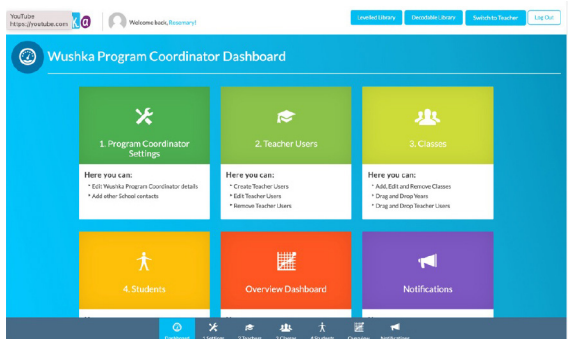

Need support? We're here to help.

Simply email MTA Online Learning Support: onlinelearning@teaching.com.au or call **1800 251 497** to speak to an eLearning representative.

Step 2 - Create 2023 Classes

Here's where we create new classes for 2023.

1 Click **3. CLASSES TAB**.

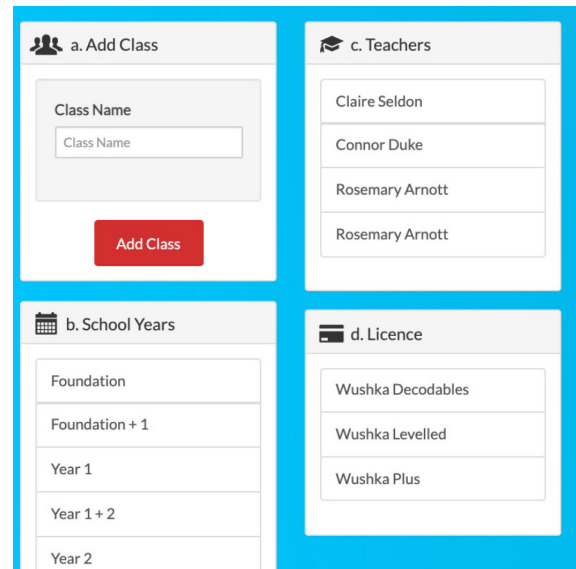

2 Click tile **a. ADD CLASS** and name your new class. This will create a class tile on the right hand side.

3 Now drag and drop:

- The Year Group from tile **b. SCHOOL YEARS**
- The Teacher/s assigned to the class from **c. TEACHERS**
- The Licence type from **d. LICENSE**

You can only assign one licence type to each class. If you would like to assign two licence types within one class (ie. Levelled for some students and Decodable for others) then simply create another Wushka class with the same details (and a different name).

Repeat for every new 2023 Class.

HINT: Creating clear, consistent class titles with the academic year makes organisation easy!

Simply email MTA Online Learning Support: onlinelearning@teaching.com.au or call **1800 251 497** to speak to an eLearning representative.

Step 3: Add Students

Now you have your classes set up, you can start adding students. Here you have two options.

OPTION

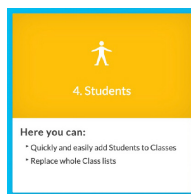

1

Rollover students one by one

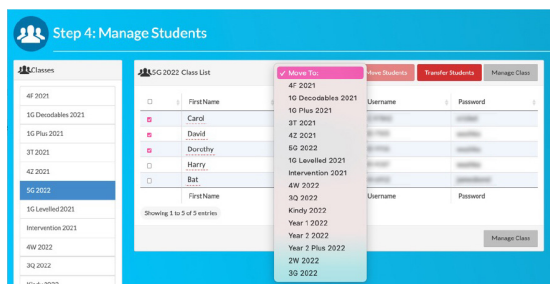

- Retains student data
- Same User names and passwords
- Takes a bit more time

In this step we will be selecting students from their 2022 classes and moving them across to their 2023 classes.

- 1 Click the **4. STUDENTS TILE**.

- 2 Under **CLASSES**, select a 2022 class with students that need to be moved to their 2023 class.
- 3 Select students you would like to move to the new class.
- 4 Click the **MOVE TO** tab and locate their new 2023 class.
- 5 Click "Move Students".

These students have now been moved to their 2023 classes!

You will need to repeat this for all 2022 classes until you're confident all students have been moved to their 2023 classes.

NOTE: All kindergarten students will need to be uploaded using option 2.

OPTION

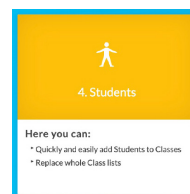

2

Upload a fresh class list

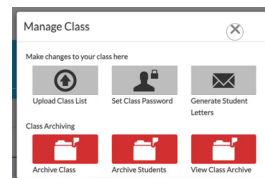

- Faster!
- More time efficient for big schools
- New user names
- Doesn't retain 2022 data

In this step we will be uploading fresh class lists to Wushka. You will need to repeat these steps for each 2023 class so have your 2023 class lists handy!

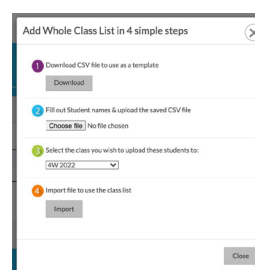

- 1 Click the **4. STUDENTS TILE**.

- 2 Under **CLASSES**, select the new 2022 class you would like to upload students to.
- 3 Click **MANAGE CLASS**.

- 4 Click **UPLOAD CLASS LIST**.
- 5 Click **1. DOWNLOAD CSV FILE TO USE AS A TEMPLATE** and add your class details.
- 6 Once complete, save the template (Hint: ensure the template is saved as a .CSV file).
- 7 Click **CHOOSE FILE** and navigate to your template.
- 8 Select the 2023 class name you would like to add the students to.
- 9 Click **4. IMPORT**.

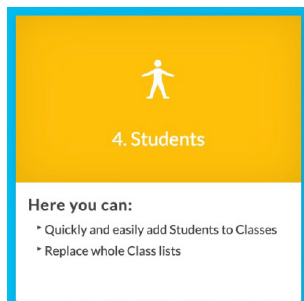

Your new 2023 class list has been uploaded.

Step 4 - Archive Old 2022 Classes

In this step we'll be archiving and deleting 2022 classes.

- 1 Click **4. STUDENTS**.

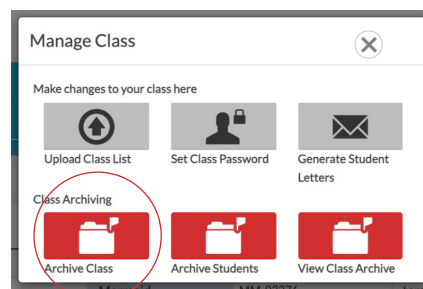

- 2 Under **CLASSES** select old 2022 class.
Hint: Ensure any left over students don't need to be assigned to a 2023 class.

- 3 Click **MANAGE CLASS > ARCHIVE CLASS**.

The class will then be empty, and we need to delete the class itself.

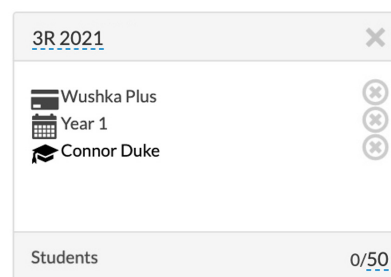

- 4 From the bottom navigation, click **3. CLASSES**.

- 5 Find the old 2022 class. Click the x in the top right to delete the old class.

HINT: It will have 0 students

Repeat for all empty 2022 classes.

And you're done!

All 2023 classes are now set up with their correct teachers and students and you're ready to Wushka!
